Here at Cool Relief, we aim to offer you the highest quality cold therapy products, for the lowest cost. Our company sells the same cold therapy wraps that hundreds of surgical hospitals and orthopedic clinics prescribe nationwide, without the visit to the hospital or clinic. We specialize in the science of cold therapy. Our company has targeted the relief of pain, recovery, and healing. These are among our top priorities, and we are here to help you sell the highest quality cold therapy wraps for the lowest cost possible.

ABOUT OUR COMFORT GEL PRODUCTS

Most ice wraps available on the market freeze solid and are not malleable, the wraps that are soft and flexible typically include gel alone which will not stay cold very long (in most wraps 15 to 30 minutes.) A select few companies use segmented water mats inserted into gel bags to extend therapy time up to almost 2 hours while still staying soft. However, our company found that most of the ice mat is excessive and simply make products more expensive, while leaving the patient with less flexibility.

Cool Relief's product has taken this idea to the next level, and lowered the cost. Our comfort gel products have individual "ice pillows" breaking up the ice mat and making the product as malleable as possible while still keeping the unit as cold as possible for the longest time.

With our product's adjustable elastic the wraps provide cold compression therapy deep into muscle tissue while the individual ice pillow inserts can be utilized toward the source of the pain. Our soft gel products are malleable immediately from the freezer, and can be used in a variety of ways. These products rival the highest priced on the market. Whether for work related injuries, athletic injuries, post surgery, or just staying cool; we bring them to you at a lower cost.

ABOUT OUR ICE PRODUCTS

Our ice wraps contain a two layered segmented ice insert made of non-toxic purified water containing a USDA approved, food-grade freezing agent. These lightweight segmented water mats offer more coverage and longer duration of cold between insert rotations. Less malleable, they provide more support to the injured area in a way acting like a cold compression cast.

All Cool Relief therapy wraps are made from a combination of hook attachable nylon velvet loop (soft foam material) and a micromesh backing. This provides the patient with the coldest therapy possible, keeping the temperature inside the wrap guided toward the affected area of the body. Our wraps include removable inserts (Gel or Ice) unlike many competitors. They are held inside this pocketed sleeve by a hook and loop fastener (Velcro) sewn at points in an opening. With this concept, purchasing a second insert allows the patient continuous relief, rotating both units from the freezer.

Whether your Cool Relief product is for a work related injury, athletic injury, or post surgically, we have your continuous cold therapy option. We know your customers demand top quality products while keeping costs low. That's why we've produced a convenient, cost-sensitive, prescription quality line of cold therapy products for short term recovery or long term needs. Let your customers get the "Cool Relief" they deserve with one of our cold therapy units.

SOFT KNEE THERAPY WRAP

SK-1/SK-2 SKL-1/SKL-2

The Cool Relief cold compression knee therapy wrap will relieve pain due to knee surgery, athletic knee injury, joint pain and swelling of the knee. The lightweight Cool Relief soft knee is extremely malleable and conforms comfortably to the leg covering the entire knee area. The 12" by 13" wrap contains two adjustable elastic straps which produce compression to the knee; the cold knee wrap also has a removable gel insert allowing continuous cold compression.
